About This Paper

This paper describes the concept, vision, community philosophy, token structure and potential development of Party at the Disco ($DISCOP).

Party at the Disco is a meme-coin project built on the Solana blockchain and launched through Pump.fun. The project combines internet culture, nostalgia, humor and community participation around a simple character: the Disco Ball.

This paper is intended to explain what Party at the Disco is, why it exists, how the $DISCOP token fits into the project, and how the community may help shape its future.

A Few Things Before the Music Starts

$DISCOP is a meme coin.

It is not presented as a traditional investment, stock, equity, or ownership interest in a company.

The project does not promise profits, a particular token price, a particular market capitalization, exchange listings, future revenue or any other financial outcome.

The value of $DISCOP may fluctuate dramatically, and participants may lose some or all of the money they spend acquiring the token.

The roadmap and future ideas described in this paper represent the project's current direction and aspirations. They are not guarantees that every proposed initiative will occur.

Party at the Disco is ultimately an experiment in what can happen when a recognizable meme, a good story and an active community come together.

> **So before we talk tokenomics, roadmaps and market mechanics, there's something more important to understand: this party started with a Disco Ball. And the ball is already spinning.**

1. Welcome to the Party

Welcome to Party at the Disco.

A place where crypto meets nostalgia, memes meet music, and the most important rule is simple: don't take the party too seriously.

Party at the Disco is a community-driven meme coin project built on Solana around a simple idea: crypto should be fun again.

There are thousands of tokens competing for attention. Some promise to change finance. Some promise to change the world. Some promise technology nobody understands.

$DISCOP has a different mission.

> **Turn on the lights. Start the music. Bring people together. And let the disco ball spin.**

Party at the Disco is designed to be a meme, a community, a story and an experience — with the potential to grow into whatever the community decides to build.

2. The Story of the Disco Ball

Every great party needs a disco ball. But this one has a story.

Long before anyone knew about $DISCOP, before the website, before the community and before the first token was created, there was simply… The Ball.

It hung quietly in the darkness. Waiting for the lights. Waiting for the music. Waiting for someone to finally turn the party on.

Then one night, the lights came up. The music started. And the ball began to spin.

One beam of light became two. Two became dozens. Soon the entire room was covered in reflections.

> **And that's when the Disco Ball discovered something: a single light can become thousands of lights when it keeps moving.**

That became the inspiration behind Party at the Disco.

The Disco Ball represents the idea that a community doesn't need one person to create all the energy.

Everyone contributes a little. One person brings a meme. Another brings a post. Someone brings a friend. Someone creates artwork. Someone tells the story. Someone simply shows up.

And together, those small contributions create something much bigger. The party gets brighter because everyone adds a little light.

3. The Idea

Party at the Disco is built around three principles:

- FUN — Meme coins don't have to pretend to be serious financial institutions. They're part of internet culture. Humor, creativity and entertainment are part of the experience.
- COMMUNITY — The project is intended to grow through participation. The community isn't simply an audience watching a project. The community is part of the party.
- POSSIBILITY — Nobody knows where a meme can go. A meme can disappear tomorrow. Or it can become a recognizable internet brand. The future of Party at the Disco will depend on participation, creativity, execution and the community that forms around it.

There are no guarantees. But there is a dance floor.

4. What Is $DISCOP?

$DISCOP is the native meme token of Party at the Disco.

The token is being launched on the Solana blockchain through Pump.fun.

The project is intentionally designed as a meme-coin/community project rather than as a promise of a complicated technological protocol.

The value proposition is straightforward: people join because they enjoy the idea, the culture, the community and the possibility of seeing the project grow.

$DISCOP does not represent ownership in a company. It does not represent equity. It does not guarantee profits. It does not guarantee appreciation.

It is a speculative digital asset whose market value can fluctuate dramatically, including potentially falling to zero.

5. The Party

The Party at the Disco ecosystem begins with three places:

- The Dance Floor — The community. This is where people participate, share memes, create content, discuss the project and help determine where the party goes.
- The Stage — Social media. X/Twitter will be a primary place for announcements, memes, community challenges, milestones and the ongoing story of Party at the Disco.
- The Back Room — Telegram. A more direct community environment for conversation, coordination and hanging out.

The goal isn't simply to accumulate followers. The goal is to create a community that actually wants to participate.

6. Why a Disco Ball?

A meme needs a recognizable identity. The Disco Ball provides one.

It is simple. It is visual. It is nostalgic. It is instantly associated with music, dancing and celebration.

More importantly, it provides Party at the Disco with something beyond a random token name: a character.

The Disco Ball can become the face of the project. It can appear in memes, social posts, website artwork, community contests, digital collectibles, animations, merchandise, videos, milestone celebrations and future Party at the Disco experiences.

> **The Disco Ball isn't just a logo. It's the host of the party.**

7. Token Information

PROJECT Party at the Disco	**TOKEN** $DISCOP
BLOCKCHAIN Solana	**LAUNCH PLATFORM** Pump.fun
TOTAL SUPPLY 1,000,000,000 $DISCOP (expected, subject to final Pump.fun launch configuration)	**CONTRACT ADDRESS** TBD — added after launch
WEBSITE PartyAtTheDisco.meme	**X / TWITTER** https://x.com/patdparty
TELEGRAM https://t.me/PartyAtTheDisco	

Final token information will be published publicly before or at launch.

8. Tokenomics

Party at the Disco intends to maintain a straightforward token structure.

The final tokenomics will be published before launch or when available and will clearly identify total token supply, liquidity, any reserved tokens, any promotional allocations, any future distributions and applicable Pump.fun launch mechanics.

No Mystery Math

The project intends to avoid unnecessarily complicated tokenomics. The goal is simple: know how many tokens exist. Know what can change.

Any material change to the intended token structure will be communicated to the community.

9. Liquidity & Launch

$DISCOP is planned to launch through Pump.fun on Solana.

The precise launch configuration will be disclosed before launch.

The project will not represent a particular market-cap outcome, price target or guaranteed liquidity level. Market conditions can change rapidly.

Buyers should understand that meme coins can experience:

- Extreme volatility
- Low liquidity
- Large price movements
- Rapid market-cap changes
- Significant losses and potential total loss of capital

10. Community Philosophy

The Party at the Disco community is built around one concept: everybody gets on the dance floor.

A successful community isn't created by one person posting endlessly. It grows when members participate.

Community members may contribute through memes, artwork, videos, social posts, community events, contests, partnerships, promotions, ideas, storytelling or simply bringing good energy.

The project welcomes creativity.

There is no dress code. There are no velvet ropes. And there is absolutely no requirement to wear platform shoes. Although… platform shoes are strongly encouraged.

11. The Disco Code

- Have Fun — This is a party.
- Don't Be a Jerk — Respect other members.
- Don't Fake It — No manufactured claims about partnerships, listings, investors or results.
- Don't Promise the Moon — Nobody can guarantee where a meme coin goes.
- Keep the Lights On — Help the community grow through positive participation.
- Bring Your Friends — Every great party needs more people on the dance floor.

12. Roadmap

The Party at the Disco roadmap is intentionally flexible. It describes direction, not guarantees.

- Phase 1 — Turn On the Lights: launch $DISCOP on Pump.fun, publish the white paper and website, open the community channels.
- Phase 2 — Fill the Dance Floor: memes, community challenges, artwork, collaborations and growing the crowd.
- Phase 3 — Turn Up the Volume: expanded content, community events and broader visibility for the Disco Ball character.
- Phase 4 — Beyond the Disco: whatever the community decides to build together.

This roadmap represents the current direction and goals of Party at the Disco. Priorities, features, timing, and milestones may evolve based on community input, market conditions, technical considerations, and the continued development of the project. The roadmap is directional and should not be interpreted as a guarantee or promise of future performance.

13. Community Milestones

Milestones are measured in people, not price targets.

- 100 Members — The first people on the dance floor.
- 1,000 Members — The party is getting crowded.
- 10,000 Members — Time to make some room.
- 100,000 Members — Somebody better call the DJ.
- Beyond the Disco — The party becomes bigger than the original room.

Milestones are celebrations, not promises of financial performance.

14. The Long-Term Vision

Party at the Disco begins as a meme coin. But the larger idea is bigger than a token.

The vision is to create a recognizable internet brand built around fun, community, nostalgia, creativity and participation.

The Disco Ball becomes the symbol. The music becomes the culture. The community becomes the party. And $DISCOP becomes the token that represents that party.

Where it ultimately goes depends on what the community creates.

15. Why $DISCOP?

There are thousands of meme coins. Why this one?

Because Party at the Disco isn't trying to win by pretending to be something it isn't.

It doesn't need a complicated technical narrative. It doesn't need to claim that it will revolutionize global finance.

It needs something much harder: a reason for people to remember it.

- A recognizable name
- A recognizable character
- A recognizable story
- A community people enjoy being part of
- An identity that can exist beyond a token chart

That's the Party at the Disco idea.

16. What $DISCOP Is — and Isn't

$DISCOP IS

A Solana-based meme token; a community project; an entertainment-focused crypto project; a meme and cultural experiment; a project built around the Disco Ball character; a community that can help determine its future.

$DISCOP IS NOT

A stock; equity in a company; a guaranteed investment; a promise of profit; a promise of appreciation; a dividend-producing asset; a guaranteed source of income; a promise of future exchange listings; a financial advisory product.

17. Risk Disclosure

Cryptocurrency assets, and meme coins in particular, involve substantial risk.

The price of $DISCOP may rise substantially, decline substantially or become effectively worthless.

Purchasing $DISCOP should only be considered by individuals who understand and are willing to accept the possibility of losing some or all of the money they spend acquiring it.

Nothing contained in this paper should be interpreted as financial, investment, legal or tax advice. No statement in this paper should be interpreted as a guarantee of future performance.

Potential participants should conduct their own research and consult qualified professional advisers where appropriate.

18. No Guarantees

Party at the Disco makes no guarantee regarding token price, market capitalization, trading volume, liquidity, number of holders, exchange listings, future partnerships, project revenue, community growth, future development or token appreciation.

The project may evolve. Some ideas may never happen. Other ideas may emerge that are not currently contemplated.

The roadmap is a direction, not a promise.

19. The Future Belongs to the Party

Every project starts somewhere.

Party at the Disco starts with a disco ball. A light. A beat. A meme. And a simple invitation: come dance.

Nobody knows exactly how far the party can go. That's part of the fun.

Maybe the dance floor stays small. Maybe it fills up. Maybe the music gets louder. Maybe the party eventually leaves the room.

> **But one thing remains: the Disco Ball keeps spinning.**

20. Final Word From the Disco Ball

I've been hanging around in the dark for a long time. Waiting for someone to flip the switch.

Then the lights came on. The music started. And suddenly… everybody wanted to dance.

So if you're looking for a serious financial institution… you may have taken a wrong turn.

But if you're looking for a meme, a community, a little nostalgia and a place where the disco ball never stops spinning… welcome to Party at the Disco.

> **THE LIGHTS ARE ON. THE MUSIC IS PLAYING. THE DANCE FLOOR IS OPEN. LET'S PARTY.**

21. Official Information

PROJECT Party at the Disco	**TOKEN** $DISCOP
BLOCKCHAIN Solana	**LAUNCH PLATFORM** Pump.fun
